

[SYSTEM FOR AUTOMATING OPERATING PARAMETER LIST PROCESS]

Abstract of the Disclosure

A system for automating an operating parameter list process includes a web-based interface for accessing OPL data. Databases are provided for storing updated OPL parameter values for use in resolving the OPL process with respect to a particular operation cycle. The OPL data is provided in a format that is accessed and modified by various parties, with updates and notifications provided accordingly. Access to past OPL cycles is also provided.
